RAKE
DIMENSIONAL PORCELAIN SUBWAY TILE

Glossy Finish

RAKE

Rake is a dimensional porcelain subway style tile in neutrals as well as vibrant jewel tone colors. An extruded porcelain tile, this series has a dimensionality that is unique to each tile. There are 8 colors that can come in a flat surface as well as a linear textural design. Additionally there are 7 specialty tiles that are hand glazed with bold glazed that change during the firing to really give a one of a kind look.

**Rake is a extruded porcelain tile, it is not a pressed tile. Extruded tiles have variations in size between tiles and may appear inconsistent. We recommend using a grout joint of 3-4mm. We recommend using a grout color that will complement the product, as contrasting grout colors may accentuate the variation in product size.*
