JOINTED

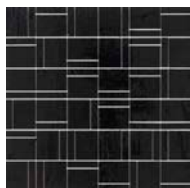

Beyond the traditional mosaic concept, beyond chip size, and rigidly defined geometrical space, the range of Jointed takes a fresh approach, extending the material's expressive potentials and the languages used to convey them. In Jointed, the 2x2" chip is engraved with a graphic motif providing the basis for 5 different formats. The random composition of each of the subdivided chips transforms the simple surface into a complex array, varying depending on the way the sheets are installed, which may be repetitive or in a random layout.
