TERRACOTTA 3D ELEMENT

# RENGA

The collection features one single terracotta element in a 15x25x15 cm format. Inspired by masonry, Renga has a strongly architectural design: a vertical parallelepiped with a square base, the four corners of which are covered by four cylinders that create an overall softer appearance. Renga is produced with the casting technique, using a colored liquid stonewear mixture so as to obtain a very tactile and matte surface. In this way, each piece is unique and characterized by always slightly different hues. It is available in three shades: Ivory, Brown, and Grey.

## Vincent Van Duysen

“Renga is a micro-architecture, conceived to be multiplied like brick constructions. This makes it possible to create a great variety of forms within a space.”
